FILLERPROXIDIL® CAPILLARY SOLUTION WITH NANO-FACTOR VEGF REFERENCE DERMO-COSMETICS

The package contains: 01 Shampoo - 120mL, 01 Conditioner - 120mL, 04 Ampoules - 6mL/unit, and 01 Food Supplement - 240g / 60 units.

Do not use this product if you have wounds or injured skin. The effectiveness of this medicine depends on the functional capacity of the patient. The Fillerproxidil® Ampoule is transparent to a slightly yellowish solution.

WHAT IS THE PURPOSE OF THIS TREATMENT?

FILLERPROXIDIL® is indicated for the topical treatment of androgenetic alopecia, alopecia areata, telogen effluvium, oiliness scalp, and dandruff. It works to clear the hair bulb and stimulate hair growth.

HOW DOES FILLERPROXIDIL® WORK?

FILLERPROXIDIL® works by reversing follicular atrophy induced by the hormone DHT. Increases the size of follicles. Stimulates Capillary Angiogenesis: the emergence of new blood capillaries surrounding the new follicle – essential for hair nutrition and vitality. With Fillerproxidil® once-a-week application for one month, the results begin to appear. New hair begins to grow, and hair fall is minimized. We recommend applying the Fillerproxidil® kit for three months to achieve 100% results of stopping hair loss and for capillary growth to become evident. **Individuals differ in the amount of hair that will regrow and the time it will take for the best results to be achieved.**

OBSERVATIONS AND CONTRAINDICATIONS

Before using FILLERPROXIDIL®, check that the scalp is healthy. Do not use if the skin or scalp is injured, inflamed, reddened, irritated, painful, or under conditions of sunburn or dermatitis. Do not use the product if you have an allergic reaction to any component of the formula. FILLERPROXIDIL® contains Methyl Nicotinate in its formulation, which is hyperemic, rubefacient, and vasodilator active, which causes redness and a slight local warming sensation. This effect is normal and necessary so that there is an increase in blood oxygenation, essential in the process of stimulating the emergence of new hair. It does not cause an allergic reaction. Effects last for 3-5 minutes after application. After applying the Ampoule, wait at least 15 minutes before using hair dryers, gels, creams, or finishing sprays. Wait at least 4 hours before washing your hair again, if necessary. Apply a total dose of 6mL of the Ampoule on the scalp, once a week, starting the application in the center of the affected area (6 drops or 1 mL per application), so that the effectiveness of the product is not compromised. The products are not recommended in cases of sudden or fragmented loss of hair, complete baldness, or total loss of hair and hair on the body, in cases where the hair loss is due to the use of some medication, severe dietary deficiency, during chemotherapy treatment, illnesses or situations that cause damage to the scalp. It should not be used if there is a family history of hair loss or if the reason for hair loss is unknown. Refer to your doctor before use. The use of tinctures, straightening or perms does not interfere with the product's action. However, in order to avoid any local irritation, make sure there is no Fillerproxidil® on the scalp before applying any chemicals. For best results, do not apply the product on the same day as chemical procedures on the hair. Store products at room temperature (between 15°C and 30°C). Protect from light, heat and humidity. Keep bottles tightly closed after use.

HOW SHOULD I USE THE PRODUCTS?

Due to the fact that the FILLERPROXIDIL® Line consists entirely of topical products (except Gummie), it is considered more effective than other dermo-cosmetics when applied directly to the affected area. 100% of participants showed a reduction in hair loss in clinical evaluations.

USING PROCESS: The products must be applied to the scalp, except for the Food Supplement (Gummie), which must be used orally, as indicated.

SIDE EFFECTS: Through clinical tests, it was concluded that FILLERPROXIDIL® products do not cause any adverse reactions to their use. The study shows that no participant reported feelings of discomfort after using the products. No clinical signs of adverse reactions were detected.

Shampoo, conditioner and ampoule: Once-a-week application.

Wash the hair with FILLERPROXIDIL® SHAMPOO, applying the product to the palms of the hands and spreading directly over the wet scalp.

Make a light massage with your fingertips and let it act for 3 minutes. For better cleaning and cleansing, repeat the process. Rinse well.

NOTE: This shampoo is a scalp treatment. Therefore, it is not indicated to use it for washing the hair strands. The foam that forms in the application is enough to clean the hair during the use of the shampoo.

Apply FILLERPROXIDIL® CONDITIONER over the entire length of the hair, away from the scalp.

Lightly massage the hair and wait 3 minutes. Rinse and dry well with a towel.

Then apply the FILLERPROXIDIL® AMPOULE directly to a damp scalp. Make a light circular massage with the fingertips, don't rinse it. **Wait for 15 minutes** for the total absorption of the active ingredients. Finish your hairstyle as you desire.

Take 02 (two) Gummies per day.

Daily consumption of the food supplement is essential to obtain satisfactory results.
